

European Biodiversity Observation Network 2008-2012

What do we aim at?

- Develop and implement a European biodiversity observation network;
- Link institutions in Europe for monitoring of terrestrial biodiversity and include their priorities;
- Expand outside Europe through related Mediterranean and desert regions (Israel, South Africa).

Linking Species

Habitats

Earth Observation

- We intend to deliver the basis for continued European Biodiversity Observation;
- We want to provide a common European basis or reporting on biodiversity;
- We contribute to the GEOSS implementation plan, tasks EC-07-02 and BI-07-01.

Biodiversity Monitoring in time and space

Environmental Zone

ALN - Alpine North
BOR - Boreal
NEM - Nemoral
ATN - Atlantic North
ALS - Alpine South
CON - Continental
ATC - Atlantic Central
PAN - Pannonic
LUS - Lusitanian
ANA - Anatolian
MDM - Mediterranean Mountains
MDN - Mediterranean North
MDS - Mediterranean South

Monitoring pattern in space (using km²), Provence (F)
